What is Game & Watch?

2

Originally released in the early 1980's, the "Game & Watch" line marked Nintendo's entry into the portable video game market. Featuring liquid crystal displays, and a handy size small enough to fit in a pocket, they quickly became a hit everywhere for gamers on the go. "Ball," released in 1980 was the first of many released by Nintendo.

MANHOLE

Keep up with the moving pedestrians and do not allow them to fall through an empty manhole cover!

Released in 1980 and 1983.

FIRE

Oh no, the building is on fire! When the people jump, can you safely help them to the ambulance?

Released in 1980 and 1981.

OCTOPUS

Dive among the tentacles of a giant octopus to retrieve treasures stowed in Davey Jones' locker!

Released in 1981.

OIL PANIC

The pipes are leaking! Catch the dripping oil and find a way out of this crisis.

Released in 1982.

A Portable Evolution Takes Place

As the library of Game & Watch games grew larger, Nintendo continued its exploration into many different types of liquid crystal displays and game control systems. Milestones were made as the wide and multi-screen displays came into use. These were followed by panoramic, color and even table top Game & Watch models! Also pioneered during this time were game control systems that evolved into the now familiar + Control Pad and button configuration.

Whether or not you ever had a chance to enjoy the originals, we hope you thoroughly enjoy your stay.

What is the Gallery Corner?

7

Earn more than a certain number of points in each game and you will be treated to the Gallery Corner. The exhibition you see will appear each time you go to the Gallery Corner. You can access the Gallery Corner from the Title Screen. However, this option won't be available until you earn enough points.

Read the "hints" carefully and try to see all the displays!

Let's Start!

Correctly insert the Game & Watch Gallery Game Pak into the Game Boy system and switch the power to the ON position. The "Nintendo" logo will appear for a few seconds, followed by the title screen and a demonstration. Press any button to display the Game Select screen.

About the SAVE

Game & Watch Gallery has an automatic save feature that will save the best score of each game. The best score can be seen on the Mode Select screen of each game.

Game Select Screen

If you press any button while the title screen is displayed, the Game Select screen will appear. Select any game by pressing $\uparrow$ or $\downarrow$ on the + Control Pad, then press the A Button to enter.

Press $\leftarrow$ or $\rightarrow$ on the + Control Pad to scroll the screen and reveal the milestone scores achieved for each game. Each milestone achieved will be displayed by a ★. The top row of milestone ★'s is for the Modern mode, the lower row is for the Classic mode. One ★ is worth 200 points.

Collect five ★'s in each game to reveal a secret!

Mode Select Screen

After a game is selected, the Mode Select screen will appear. Use the + Control Pad to select which mode and difficulty level you want to play. You can press START or the A Button to begin the game.

Classic mode ... "Game & Watch" original version!

Modern mode ... Updated version!

In the Modern mode, you can turn off the background music. On the Mode Select screen, press SELECT, and the flashing musical note indicator in the upper left of the screen will disappear, indicating the background music is OFF.

Interrupt Save

Game & Watch Gallery also features an Interrupt Save function that allows you to continue a game even if you switch the power OFF. To use this feature while playing, press START to pause. When the Pause menu is visible, turn the power switch to OFF to use the Interrupt Save. The next time you turn the power ON, a message will appear on the title screen stating "INTERRUPT SAVE" and will indicate which game and mode has been saved. Press START to continue the game.

NOTE: The Interrupt Save function can only save one game in progress. When you restart the game, your Interrupt Save data is erased.

Super Game Boy®
